

i3's Ai-based Social Distancing system

i3's Ai-based Social Distancing system is developed to keep your work environment safe and reduce the risk of potential COVID-19 infections. Our solution helps your managers re-enforce your policy of social distancing in the work environment by providing them with real-time alerts and reports. Those alerts and reports identify how many incidents are taking place in your facility. With this data in hand managers can now take effective action and engage with the employees on how to practice social distancing.

Accurate and Precise

- ✓ Our system streams live and can be added to your existing CCTV system.
- ✓ Easy to set up and maintain as our advanced Ai algorithms automatically detect the distance between people within your facility.
- ✓ Distance and time thresholds can be predefined and violations can be alerted.

WHAT'S IN IT FOR YOUR BUSINESS?

Monitor and Act In Real Time

- ✓ Detect when people are standing too close for a duration of time.
- ✓ Identify problem areas that may cause repeat issues and where social distancing is not being adhered to.

Educate, Learn, and Improve

- ✓ Automated reporting on social distancing issues from multiple areas within a building which helps management confirm that their program, process, and policies are working.
- ✓ Ensure accountability by receiving live and historic reports on the number of incidents which may have occurred.
- ✓ Compare and analyze multiples sites, regions and districts with comprehensive reports.
