

i3 Artificial Intelligence

Leverage your traditional video surveillance system into a powerful tool to increase profit

i3 International's unique solution specifically designed to increase profitability in your industry by maximizing your business' throughput and monitoring your sales goals.

Ensure staff compliance and optimize customer experience through monitoring staff response and service time

How does it work?

Minimize Customer Wait Time

i3 Ai accurately manages and controls your unique store queue time

Examples of how this feature of i3 Ai can be used in industries:

- In-store customer wait time in **restaurants**
- Service time in bays at **car service stations**
- Check-out lines in **grocery stores**

Measure Customer Behaviour

Easily understand in-store behaviors and patterns of your customers to better service them.

i3 Ai paired with POS integration automatically tracks your in-store best-sellers to ensure owners can take advantage of each sale.

Reduce False Alarms

Businesses and facilities can use i3 Ai paired in conjunction with your perimeter protection to ignore non-human triggers, and therefore greatly reduce false alarms with accuracy
