Re: End of Life schedules for i3 Server DVRs, HVRs and NVRs

To all of our customers and partners;

Fast advancements in the industry cause the replacement parts to become obsolete and unavailable very quickly. While i3 International commits to service any hardware product during its warranty period, i3 International’s standard length of service for any hardware product is limited to 5 years. This means we cannot guarantee RMA repairs for units manufactured 5 years ago or earlier.

Technical support can still be obtained for out-of-warranty units at a standard service charge rate*. Please be advised that due to the age of the system not every technical issue can be resolved.

For reference, see the table below for the End of Life and End of Service dates for i3’s line of SRX-Pro Servers based on the serial range.

Table 1. End of Life/Service for i3 SRX-Pro product series.
