**Release Announcement: Annexus 77R2, 5MP Outdoor Fixed Mini IR IP Dome**

To all our customers and partners,

i3 International is pleased to announce the release of the 5MP Outdoor IP mini dome camera: Ax77R2.

i3's Annexus Ax77R2 megapixel IP camera features 5MP video resolution and comes with a 2.8mm built-in lens.

This new camera series delivers triple streaming performance and supports H.265, H.264 and Motion JPEG video compression. H.265 codec allows for faster and more efficient video transmission over the network. This dome camera comes with True Wide Dynamic Range (WDR), a feature that allows the cameras to adjust to varying outdoor lighting conditions and provides the best video quality despite the presence of high and low exposure areas in the camera's lens view. Annexus 77R2 cameras require PoE power and come with the Day/Night capability.

These moisture-, dust- and vandal-resistant cameras are IP67-certified and IK09-compliant, which makes them suitable for outdoor conditions, while also being perfect for the indoor installations. Corridor view is available for users that would like to view a hallway or a single store aisle.

The versatility of Ax77R2 IP cameras makes them suitable for a range of video surveillance applications, including government and industrial buildings, retail environments, airports, railway stations and schools. These series are suited for use with the i3's NVR and HVR - Video Management Systems.

Ax77R2 camera series is backed by i3 International's superior 5-year limited camera warranty.

Please visit our website for the complete list of company policies:
