

Re: U16 Media Control Centre Release

January 24, 2024

To all of our customers and partners;

i3 International is pleased to announce the release of the SRX-Pro Core Media Control Center – U16.

U16 features a built-in Power-over-Ethernet (PoE) switch able to support up to 16 IP cameras, eliminating the need, and therefore the cost, of an additional external switch.

U16 fits extremely well with a variety of i3 solutions, including CMS, Velocity Timer Solution (VTS), i3 Cloud Backup, and i3Ai Cloud, as well as traditional security applications.

U16 runs i3's Core version of the SRX-Pro software that combines practicality with performance. U16 can be purchased singly or bundled with 16 IP or analog licenses for best value. Note, however, that U16-L and U16-LA do not support PACDM or Ai functionality.

The U16 comes with two video outputs for both the legacy DVI and the latest HDMI monitors. It has a dual network card to simplify separating the IP camera network systems from the Internet connection used for remote viewing via i3's Video Pilot Client (VPC).

The U16 is Cloud-ready and can be paired with the entire range of i3 Cloud solutions.

For your peace of mind, U16 comes with a solid 3-year parts and 1-year labor warranty.

Key Features:

- Up to 16 video channels (IP or analog, via LD16 switch)
- Storage expandable to 2 HDD (up to 36TB)
- HDMI and DVI ports for local live viewing
- Embedded Windows 10 IoT OS, residing on m.2 SSD (512GB)
- Combine with CMS, i3 Host, i3Ai Cloud, i3 Cloud Storage, or Velocity Timer Solution (VTS)
