Re: Hardware change notice. Intel Motherboard DQ965GF.

To all of our customers and partners;

This is an official hardware change notice. In order to keep up with the rapidly changing technology and to improve the versatility of the end product, i³DVR will be changing the motherboard model for the entire line of Compact Wallmount DVRs, including Ultra Lite, Lite and SRX-Pro Hybrid models. In the next few months i³DVR will be switching from *ASUS P5B-VM* motherboard model to *Intel DQ965GF* model.

Staying committed to UL standards, i³DVR made sure that the selected motherboard was UL-certified, which will allow us to continue manufacturing DVMS that carry the UL certification rating.

Among some of the clear advantages, Intel motherboard features a total of 6 Serial ATA (SATA) inputs and a total of 10 2.0 USB ports (6 external, 4 internal). *Intel DQ965GF* motherboard also supports up to 8GB of RAM and features 2 conventional PCI and 2 PCI Express bus connectors.

Please contact technical support at support@i3dvr.com or by phone: 1.877.877.7241 if you have any other questions or issues.

Thank you very much for your attention and cooperation.
Best regards,

Bob Hoang
