**Re: Hardware change notice. Intel Motherboard DG41TY.**

**To all of our customers and partners;**

This is an official hardware change notice. To stay competitive in the constantly changing industry, i<sup>3</sup>DVR will be changing the motherboard model for the entire line of Compact DVRs, including SRX-Pro Ultra Lite, SRX-Pro Lite and SRX-Pro Hybrid models.

Due to our previous positive experience with Intel line of motherboards, we will continue using the Intel brand. Starting June 1<sup>st</sup>, 2009 all Compact DVR models will be switching to **Intel DG41TY** motherboard model from the current *Intel DQ965GF*.

Since i<sup>3</sup>DVR is committed to the UL standard, selected motherboard model carries UL certification, which will ensure that all DVMS manufactured by us are UL-certified.

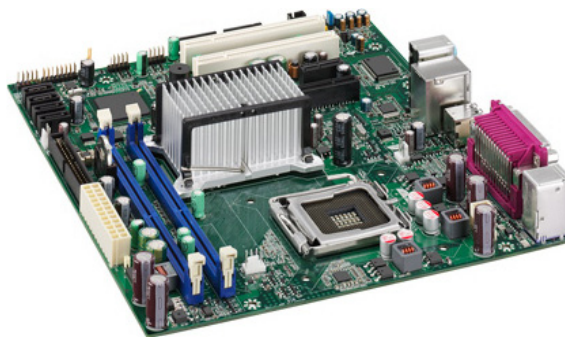

Figure 1. - Intel DG41TY motherboard

The new motherboard model, **Intel DG41TY**, meets all the requirements of our compact DVMS line. This motherboard features a total of 4 Serial ATA (SATA) inputs and a total of 8 USB 2.0 ports (4 external, 4 internal). *Intel DG41TY* motherboard supports up to 4GB of RAM and features 2 conventional PCI and 2 PCI Express bus connectors.
