RE: INTEL DG41TY

To all of our customers and partners:

Starting January 19, 2010, i³ International is changing BIOS on Intel Motherboard DG41TY. All i³Server with a serial number 118-919 or later also need to change the BIOS.

Intel updated BIOS will prevent black screen on i³Server after the system reboots. A new BIOS update for Intel DG41TY motherboard is posted on our FTP site.

Please contact technical support at support@i3dvr.com or by phone: 1.877.877.7241, provide us the serial number of your i³Server, and we gladly aid you in this matter.

Thank you very much for your attention and cooperation.

Best regards,

Technical Support and Services
