**Re: Hardware change notice. Intel Motherboard DQ77MK.**

**To all of our customers and partners;**

This is an official hardware change notice. To stay competitive in the constantly changing industry, i<sup>3</sup> International Inc. will be changing the motherboard model for the entire line of Compact Wallmount DVRs and NVRs.

Due to our previous positive experience with Intel line of motherboards, we will continue using the Intel brand. Starting immediately, all Compact Wallmount DVR and NVR models will be switching to **Intel DQ77MK** motherboard model from the current *Intel DH55HC*.

Since i<sup>3</sup> International Inc. is committed to the UL standard, selected motherboard model carries UL certification, which will ensure that all DVMS we manufacture are UL-certified.

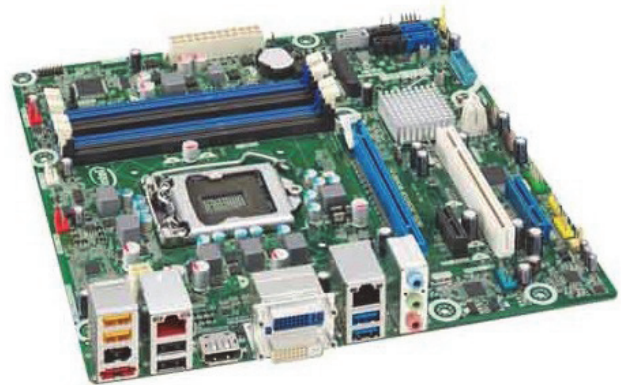

Figure 1. - Intel DQ77MK Motherboard

The new motherboard model, **Intel DQ77MK**, meets all the requirements of our Compact Wallmount DVMS line. This motherboard features a total of 6 Serial ATA (SATA) inputs and a total of 10 USB 2.0 ports (4 external, 6 internal) and 4 USB 3.0 ports (2 external, 1 internal). *Intel DQ77MK* motherboard supports up to 32GB of RAM, one PCI slot, one PCIe x4, one PCIe x1, and one PCIe x16 v3.0 connectors; moreover, this motherboard features two built-in Gigabit Ethernet Controllers (RJ-45 LAN Connectors).
