## Re: 2L/2i Series Compact Chassis Release

To all of our customers and partners;

i3 International is pleased to announce the release of the new compact Wall and Rack-mountable chassis Ax361 - 2-series.

Two main HVR configurations will be available with the new chassis: **2L1600** (upgradeable to 2 IP) and **2i0008**

This new chassis line is engineered to meet the current market demand for simplicity and affordability. Depending on the installation requirements, the 2-Series chassis can be wall-mounted, especially in locations where space is limited (wall-mount bracket optional), or rack-mounted in a server room (rack-mount bracket included). The 2-series chassis are used for both hybrid and network video recorder models.

The 2-series units come with 2 NIC ports, where the first NIC is used to connect to WAN (Internet), the second can be used for a separate LAN (additional switch), allowing users to add IP cameras.

The 2-series units can be ordered with one 1TB or 2TB OS / storage hard drive and can be ordered with up to 2 hard drives for a total of up to 6TB of video storage, depending on the size of individual drives. These series can also be upgraded to 1 channel of PACDM and 1 channel of VideoLogix.

The 2-series is a compact chassis built with the flexibility in mind to fit the varied needs of i3's customers. 2L1600 series come with 1 year parts and labour warranty, while 2i0008 series comes with 3 year parts and 1 year labour warranty.
