Re: New Pricelist Product Line Changes

To all of our customers and partners;

We're pleased to announce the upcoming price list release on **May 1st, 2015**.
The new pricelist has been revamped with the ordering simplicity in mind. Below are some of the main changes that must be considered when placing an order with i3 International after May 1st.

Effective May 1st:

1. All standard Rackmount units will come with the Solid State OS drive.

2. Storage hard drives and SBB4 SATA hard drive enclosures must now be ordered separately, as separate line items. Standard HVR and NVR Servers will no longer come with a default 1TB storage drive or SBB4 SATA hard drive enclosure.

3. To facilitate storage hard drive and SATA enclosure ordering, 6-series have been introduced as the "base" Rackmount Server model. Software licensing and storage have to be purchased along these *base* 6-series units.

6i0000 Rackmount Server + 2xSBB4

   6-series HVR/NVRs come with the Solid State OS drive and one single internal hard drive bay, storage hard drive not included.
   When purchased alone, 6i/6P series will support the addition of one single storage hard drive.
   To add more storage, purchase one or two SBB4 enclosures and the required number of storage hard drives. Equipment must be purchased together to be installed and configured by the factory. Note that when SBB4 enclosure(s) is(are) purchased, the internal hard drive bay can no longer be used.

Equipment Purchased	Maximum number of storage HDD supported (not included)
6-series Server	1 (internal HDD bay)
6-series Server + SBB4	4 (4x SBB4 SATA slots)
6-series Server + 2xSBB4	8 (8x SBB4 SATA slots)

4. New WDT (Watchdog Timer) board will be supplied with the 2-series HVR/NVR Servers and will replace the WDT-22 I/O board on all *NVR* Severs. To support sensor inputs, control outputs and RS485 PTZ communication, UIO8 (Universal Input Output device) must be purchased.
   Note: New WDT card requires the use of SRX-Pro Server software v.3.3.1 and above.
5. Rackmount brackets will be provided with all HVR/NVR Servers.
6. Wallmount kits may be purchased separately for supported units (2-, 4-, 5- series), if required.
7. DVI-I-to-VGA adapters for VGA monitors are not included in the accessories.

Note that Special Build routings will remain unaffected by the above changes and will follow previously approved specifications.
