**Re: Annexus 73RM Release**

To all of our customers and partners;

i3 International is pleased to announce the release of the new 5MP Infrared Outdoor IP Dome Camera with Motorized Lens- Annexus 73RM (Ax73RM).

This outdoor infrared dome is especially well-suited for low-light conditions. Housed in a IK10-rated vandal-resistant, water-resistant dome, the Ax73RM offers enhanced digital wide dynamic range to achieve superb image quality with a wide range of resolutions for even the most challenging environments.

Armed with 24 LED lights, the Ax73RM can display objects at 15 meters or 49 feet at 0 lux of illumination. This all-purpose outdoor dome was designed to save installation time as mounting adapters for various environments are no longer needed. Rich with practical enhancements, the Ax73RM is ideal for most installation applications. This model operates in temperatures from -40°C to 50°C (-40°F to 122°F).

This dome boasts a motorized 3-9mm lens, which further aids installation flexibility. Ax73RM's motorized lens will re-focus the lens automatically, but focus can also be adjusted manually if needed

Triple video streaming (H.264 and Motion JPEG) allows users to select the best option for their live viewing and recording needs. H.264 greatly reduces bandwidth and storage needs without compromising image quality.

The Ax73RM Series also offers digital pan/tilt/zoom with multi-view streaming. The built in internal Micro SD card provides redundancy for when connection to the DVMS is terminated, effectively reducing risk of losing data. The versatility of this network camera makes it suitable for a range of video surveillance applications, including government and industrial buildings, retail environments, airports, railway stations and schools.

Annexus 73RM camera is backed by i3 International's superior 3-year limited camera warranty as well as i3's unparalleled 2-for-1 Camera Replacement program. Please read here to learn more about Two for One camera replacement program:
