Re: New Pricelist Product Line changes

To all of our customers and partners;

We're pleased to announce that the new price list has been released on **February 22nd, 2016**.

The pricing is guaranteed for 30 days from February 22nd, 2016.

Please check the new price list for a complete list of changes including pricing changes on cameras, hard drives, and other equipment as well as new product offerings.

The new pricelist has been revamped with the ordering simplicity in mind. Below are some of the changes that must be considered when placing an NVR order after February 22nd, 2016.

Effective February 22nd, 2016

1. All standard NVR units will now come with 1 (one) 1TB approved Western Digital (Re-series) storage hard drive. That hard drive can be upgraded to 2TB, 3TB, 4TB or 6TB at the time of ordering.
2. All standard 9i NVR units will now come with 1 (one) SBB4 SATA hard drive enclosure. One extra SBB4 enclosure can be purchased at the time of ordering (for a maximum of two SBB4 enclosures). *Note: All NVR units will continue being built with Solid State OS drive.*
3. New WDT (Watchdog Timer) board is now supplied with all NVR units, replacing the WDT-22 I/O board. To support sensor inputs, control outputs and RS485 PTZ communication, UIO8 (Universal Input Output device) must be purchased.

Note: New WDT board requires the use of SRX-Pro Server software v.3.3.1 and above.
