Release Announcement: WDT (Watchdog Timer).

To all of our customers and partners;

i3 International is pleased to announce the release of the WDT (Watchdog Timer) board that replaces WDT-22 I/O board and will be supplied with all i3 NVR Servers going forward.

Important: New WDT board requires the use of SRX-Pro Server software v.3.3.1 and above.

Watchdog function will remain unchanged from WDT-22 I/O board version. Watchdog function restarts the DVMS whenever SRX-Pro software video recording stops abnormally or when the SRX-Pro software is "frozen". The watchdog function works only when SRX-Pro software is running or when SRX-Pro software has been shut down abnormally (from the Task Manager).

Note: To support sensor inputs, control outputs and RS485 PTZ communication, UIO8 (Universal Input Output device) must be purchased.

Please contact technical support if you have any questions or issues.
