**Release Announcement: 6TB Western Digital Re-series Hard Drive Approved for Production.**

To all of our customers and partners;

i3 International is pleased to announce that Western Digital 6TB hard drive, models WD6001FSYZ and WD6002FRYZ, have now been approved for production and will be available for purchase shortly.

The new 6TB hard drive is approved for all i3 NVR chassis.

**Important:**

- A. 6TB hard drive is approved for use with Windows 7 operating system **only** when used in i3 PC-based Servers.
- B. 6TB hard drive is approved for video recording and storage **only** and is not approved for use as an OS drive.
- C. The owners of older i3 HVR/NVR units with the SBB4 hard drive enclosure, who wish to upgrade or add additional 6TB hard drives to their units, must ensure that **both** DIP switches on the SBB4 fan are in the upright (ON) position (see Image 1). This DIP switch position adjusts the SBB4 fan speed to the highest setting, allowing increased heat produced by 6TB drives to dissipate safely without causing damage to the unit. This SBB4 DIP switch position is already correctly set for all 6i/7i/8i/9i units purchased on or after June 1<sup>st</sup>, 2014
