Re: Hardware change notice. DFI *Industrial* Motherboard

To all of our customers and partners;

This is an official hardware change notice. To stay competitive in the constantly changing industry, i3 will be changing the motherboard model for the entire line of Rackmount NVRs.

Starting immediately, all Rackmount NVR models will be switching to the microATX **DFI Industrial Motherboard** from the current *Intel S1200BTL*.

Since i3 International Inc. is committed to the UL standard, selected motherboard model carries UL certification, which will also ensure that NVR we manufacture are UL-certified.

Figure 1. – DFI Motherboard

The new **DFI** motherboard meets all the requirements of our Rackmount NVR line. This motherboard features a total of 6 SATA 3.0 inputs and a total of 8 USB 2.0 ports (6 internal, 2 external) and 4 external USB 3.0 ports. **DFI Industrial Motherboard** supports up to 32GB of RAM, one PCIe x1 slot, one PCIe x4 slot, and two PCIe x16 v3.0 connectors; moreover, this motherboard features two built-in Gigabit Ethernet Controllers (RJ-45 LAN Connectors).

In addition, **DFI Industrial Motherboard** provides 2 display outputs: 1 HDMI and 1 DVI-I, 6 COM ports (2 external), and 1 Parallel port.
