Re: Hardware change. RADEON HD5450 video card

To all of our customers and partners;

This is an official hardware change notice. Due to changing technology and availability, i3 will have changed the video card model for the entire line of Rackmount NVRs and some of our compact units that require 2 channel dDisplay configurations.

The RADEON *HD5450* is discontinued; all Rackmount NVR models will be switching to the R5 230 video card.

The new R5 230 is a low profile PCI-Express graphics card and offers 1GB DDR3 memory. Available outputs are Dual-link DVI-D, VGA and HDMI.

Please contact Technical Support if you have any questions or issues.
