Release Notice: Am52RM HD Analog Outdoor Vandal Dome with motorized lens.

To all of our customers and partners;

i3 International is pleased to announce the release of the next generation of the HD-TVI analog camera series: **Am52RM**.

Just as its predecessor (Am52R), this HD analog camera series is designed to use existing coaxial cable infrastructure (where present), while providing exceptional HD image, comparable to megapixel IP cameras.

The main advantage of the newest Am52RM model is the **motorized**, varifocal 2.8-12mm lens.

Am52RM offers incredible 700TVL horizontal resolution when used as an analog camera and connected to i3's capture card. When used in combination with HR16, Am52RM cameras offers 1080P video resolution. The true advantage of the Am52RM series is the acceptable coaxial cable (RG59/RG6) distance, which can reach 750 feet or greater, compared to no more than 300feet CAT5e network cable distance, recommended for IP cameras.

This true day/night camera comes with a **motorized** 2.8 to 12mm varifocal lens and a built-in Smart IR. Smart IR technology achieves superior images in low-light condition by automatic LED brightness adjustment depending on the object's distance from the camera. This moisture-, dust- and vandal-resistant camera is IP66- and IK10-rated and can be used in both the indoor and outdoor installations.

The versatility of Am52RM analog camera makes it suitable for a range of video surveillance applications, including government and industrial buildings, retail environments, airports, railway stations and schools. This series is best suited for use with the i3's NVR - Video Management System in conjunction with HR16/Veo17, i3's analog encoder.

Note, when using with HR16/Veo17, "analog channel" licensing must be purchased along with the encoder to support your desired number of analog inputs. SRX-Pro Server version 3.3.3 and up is required for HR16/Veo17 installations.

Am52RM camera series is backed by i3 International's superior 5-year limited camera warranty as well as i3's unparalleled 2-for-1 Camera Replacement program. Please read here to learn more: http://quoting.i3international.com/media/documents/pdf/en/policies/limited_product_warranty.pdf

The following modes of installation are possible: surface-mounting with back box (included), flush-mounting (with kit, not included), wall-mounting w/goose-neck bracket (not included), pendant pole mounting.

Brackets & Accessories:

- AM42FM – flush mounting kit
- DB60 – goose-neck bracket wall-mount kit
- DB60CPM – corner / pole mount kit (used in conjunction with DB60)
