Re: daVinci Lite Camera (NDB100)

To all of our customers and partners;

This technical bulletin concerns all customers that have purchased i³DVR daVinci Lite cameras (NDB100).

Please be advised that although the video input terminal block on the camera appears to accept UTP cable, this camera model in fact accepts composite video only.

In order to utilize this camera, you will require a spliced BNC cable (part# D-TBC-24) shipped with the camera. For proper wiring, please connect the ground wire to GND and the signal wire to VIDEO terminals respectively on the camera's terminal block.

Important: Do not attempt to NDB100 as a UTP camera. Some of the symptoms of the improper wiring via UTP cable are video interference and poor quality video image.

Please contact technical support at support@i3dvr.com or by phone: 1.877.877.7241 if you have any other questions or issues regarding the above.

Thank you very much for your attention and cooperation.

Best regards,

Bob Hoang
