**Re: Now Offering: Certified Technician Training**

**To all of our customers and partners;**

We are very pleased to announce that i3 International now offers a comprehensive hands-on 2-day Certified Technician Training program. This 2-day training is best suited for the experienced technicians looking to perform more complex repairs on the DVMS system, such as changing a power supply or a video card without voiding the unit's warranty. Personalized i3 Certified Technician Certificate is issued upon successful completion of the course. The certificate is valid for 2 calendar years and is non-transferrable.

To view the training agenda for this course, please visit our website:

[http://www.i3international.com/media/pdf/training/Certified Technician Training.pdf](http://www.i3international.com/media/pdf/training/Certified_Technician_Training.pdf)

**The very first 2-day training session will take place on August 2-3<sup>rd</sup>, 2011.** The total number of spots is limited to 8 and the very first seats have already been booked. If you are interested in attending this free 2-day training session, please fill out the registration form as soon as possible and fax it to 1.416.261.8406 to the attention of Olga Skelly to reserve your seats.

To complete the registration form for this course, please visit our website:
