Re: Alert Center v5.7.2.8 Release Notice

To all of our customers and partners;

This bulletin is the official notice of the Alert Center release **v5.7.2.8** release.

Released in conjunction with **CMS Web v5.8.2.5**.

Alert Center is i3 International’s real-time alert monitoring software. Receive actionable notifications concerning NVR health status, sensor, and analytical alarms from all locations under live surveillance.

Alert Centre v5.7.2.8 Improvements include:

- Alert ownership is exercised by a single user at-a-time. This ensures that no duplication of effort occurs in response to the same event.
- Location address (as entered by user) is now linked to Google Maps.
Note: For this feature to work, the address of the location must be entered into CMS Web under the Site Info tab / Site details.
- Replaced Server IP with Server ID number for easier identification of NVR in the Alert data grid.
- Added tooltips and enlarged the width of the alert detail field to better display complete alert information.
- Updated end user license agreement.

About Version:

Version 5.7.2.8 32-bit

Build Date: April 9, 2020
