Re: PAC Converter v3.6.2.63 Release Notice

To all of our customers and partners.

This bulletin is the official notice of **PAC Converter v3.6.2.63** release.

The software installation package is now available for download from the i3 website:

<https://i3international.com/support/download>

New features:

- Support CMS URL auto-redirecting from **http** to **https**. This feature can be disabled in PAC Converter settings. (v3.6.2.63; #[58306](#))

Improvements:

- AppUpdate.exe updated with PAC converter for upgrades to version 7.3 or above (v3.6.2.63; #[56902](#))

Fixed issues:

- Random SRX-Pro config backup issue fixed (v3.6.2.63; #[58870](#))

About version:

PAC Converter 3.6.2.63

Build: February 28, 2023

i3mediaserver version: 20230217

Interim Releases:

New Features:

- Support PAC converter restart from CMS Web (v3.6.2.54, #[55719](#)).
- Support AppUpdate callup on SRX-Pro v6.0 (v3.6.2.54, #[55783](#)).
- Integrate with License Management Services: Support upload license (v3.6.2.54, #[55808](#))
- i3 streaming video mode and Kinesis mode streaming support. (v3.6.2.42, #[52895](#))
- Support LPR channel linking to one or multiple POS channels. (v3.6.2.42, #[53458](#))
- Relay Server support. Allow assigning NVRs to CMS that are also actively connected to i3 Relay server. (v3.6.2.42, #[52759](#))
- Support remote connection via i3 Relay Server (v3.6.2.26, #[29065](#)).
i3 Relay Server is a paid alternative to a direct connection. Use if your IT policies prevent inbound traffic and limit the number of ports that can be opened.
- Support LPR data export (v3.6.2.26, #[47031](#))
- Support i3 Velocity Timer Solution (VTS) (v3.6.2.15; #[45166](#), #[44646](#), #[45160](#), #[44682](#), #[45441](#))

Improvements:

- Reduce the default VTS Leaderboard delay time by setting the default sensor data conversion frequency from every 30 to every 15min (v3.6.2.26; #[48655](#))
- i3 streaming video mode: Support SRX-Pro 7.3 (v3.6.2.26, #[47323](#))

Fixed issues:

- Converter now removes items/sub-items without description before sending data to CMS (v3.6.2.54; #56071)
- Fixed video streaming interruptions after API re-start (v3.6.2.42; #53879)
- Video streaming performance improvements (v3.6.2.20; #46218, #46604)
- VTS performance improvements (v3.6.2.20; #46434)
- SRX-Pro v7.3 linked POS channel to CMS Web conversion issue fixed 7.3 (v3.6.2.27, #49957)
- Various performance improvements (#48215, #55447, #55553, #56191, #56405)
