

Re: Re-enabling CMS Login Option on VPC v7.3.2.18

May 5, 2023

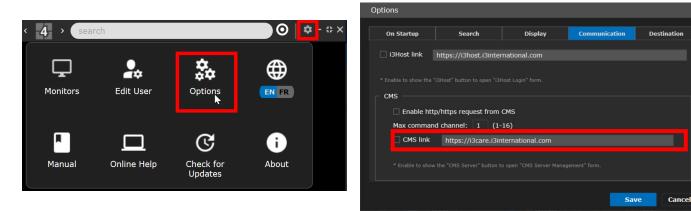

To all of our customers and partners;

Some user interface features have been simplified in Video Pilot Client version 7.3.2.18 and later. If you are a current CMS user, you might notice that the "CMS server" option is missing when you try to add a new remote connection to the VPC after upgrading the software.

You can easily restore that option on your VPC by following these steps:

Go to Settings > Options > Communication and enable CMS link checkbox, then click Save.

BEFORE

CONTROL > Add Server with CMS login options **disabled**

AFTER

CONTROL > Add Server with CMS login options **enabled**
