INTELLIGENT VIDEO DRIVING PROFIT

i3 International offers a range of applications that enable remote video viewing. The customer's needs and network requirements/restrictions will determine the most suitable application. The table below compares the key features and differences of CMS Thin Client (web-based), CMS Mobile (smartphone app), and Video Pilot Client (VPC) Thick Client (desktop software).

For additional information on port requirements, please refer to the related bulletin.

	CMS	CMS Mobile	VPC
	Thin Client	Mobile App	Thick Client
