

Re: Video Pilot Client v7.3.2.120 Release Notice

July 8, 2024

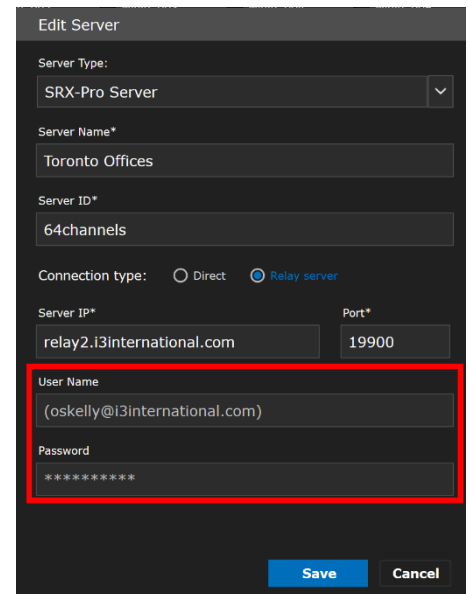

To all of our customers and partners;

This bulletin is the official notice of the **Video Pilot Client v7.3.2.120 (Build 31-May-2024)** release. The new software installation package is now available for download from the i3 website: <https://i3international.com/support/download>.

Effective **Monday, July 8, 2024** this release package will be used as the default Production software version for all standard NVRs. To continue receiving your NVRs with an earlier version of SRX-Pro/VPC v7, please speak to your RSM to arrange for a “Special Routing” to be created for your NVRs.

New Features:

- i3Host/CMS integration improvements
 - Connection type improvement. If connecting using CMS domain and credentials, follow CMS connection type selection. For user-defined connection type (Direct/Relay/Video Streaming), offer to switch between Relay and Direct connections when the current connection type fails. (#71325)
 - Server naming convention improvements. (#65945)
Servers downloaded from i3Host/CMS Servers use Site name as Server name.
 - Uncheck “Overwrite local server when download and update NVR” checkbox by default for new installations and upgrades from older versions. (#65945)
 - Support restoring the original manually-added servers, even in cases where i3Host/CMS connection has overwritten the local server information. Once i3Host/CMS connection information is removed, the servers that had been originally added manually, will be restored with their original login credential information. (#69724)
 - Show i3Host username/password for each individual NVR instead of leaving those fields blank. (#71245)

Improvements:

- Text search improvements (#72891)
 - The placeholder text in the search bar will dynamically change to match the active tab, such as "search maps", "search channels", or "search backup files".
 - Persistent search results: As you navigate across different tabs, your search results will remain intact, allowing for seamless transitions.
 - The number of successful matches will be shown. E.g. “46 result(s)”
 - Clear search text: An "x" icon will be available within the search bar for quick and easy clearing of the entered search terms.

- Open the Online Help in default browser ([#69691](#))
- Create daily VPC config folder backups, with a maximum of 4 daily backups. Overwrite the oldest one daily. ([#73020](#))

Fixes

- Allow LPR panel re-sizing ([#65197](#))
- Do not require D:\ partition to launch VPC. ([#70464](#))
- Improve the *.i3c backup file channel sorting. Sort by camera name and support search field to search for channels. ([#69264](#))

VPC v7.3 Compatibility Table.

Note: For i3 application compatibility, refer to i3's [Software Compatibility Chart](#)

i3 Application / Device	Compatibility
SRX-Pro	SRX-Pro v7.3.2.120 and higher
PACDM	PACDM v7.26.2.137 or higher PAC Converter v3.7.2.80 or higher
i3Ai	i3Ai v7.3.2.90 or higher
CMS	CMS v6.6.2.0 and higher

About Version:

Version 7.3.2.120
Build Date: May 31, 2024
