**Re: Digital Zoom In/Out Feature on SRX-Pro Server**

SRX-Pro Server allows the user to digitally zoom in/out of the video on SRX-Pro Server without having a Zoom camera installed. The operator can:

- digitally zoom in/out of the **live video** in the Live Mode
- digitally zoom in/out of the video **during the Instant Search** in the Live Mode
- digitally zoom in/out of the video **during Search** in the Search Mode
- digitally zoom in/out of the **paused image** in the Search Mode

**To digitally zoom in/out of the live video on Live Mode:**

1. **Double-click** on the desired channel to display it in a full-screen mode
2. Hold down **Ctrl** button on your keyboard and **left-click** on the video to **Zoom In** up to 18 times
3. Hold down **Ctrl** button on your keyboard and **right-click** on the video to **Zoom Out** of the video

**To digitally zoom in/out of the video during the Instant Search on Live Mode:**

1. **Double-click** on the desired channel to display it in a full-screen mode
2. **Right-click** on the video and select **Search Mode**
3. Set the playback start time
4. Click **Play** button to start playback
5. Hold down **Ctrl** button on your keyboard and **left-click** on the video to **Zoom In** up to 18 times
6. Hold down **Ctrl** button on your keyboard and **right-click** on the video to **Zoom Out** of the video

**To digitally zoom in/out of the video during Search in the Search Mode:**

1. Click on the **Search Mode** button on the main toolbar or go **Tools->Search Mode**
2. Set the date and time for playback
3. Select desired video channel on the timeline
4. **Double-click** on the video image to display the selected channel in a full screen mode
5. Click **Play** button to start playback
6. **Right-click** on the video to **Zoom In** up to 18 times
7. To zoom out, click on the plus sign "+" on the tools panel, it will become a minus sign "-".
8. **Right-click** on the video to **Zoom Out**.

**To digitally zoom in/out of the paused image in the Search Mode:**

1. Click on the **Search Mode** button on the main toolbar or go **Tools->Search Mode**
2. Set the date and time for playback
3. Select desired video channel on the timeline
4. **Double-click** on the video image to display the selected channel in a full screen mode
5. Click **Play** button to start playback
6. Click **Stop** button to stop playback at the desired frame
7. **Right-click** on the video to **Zoom In** up to 18 times
8. To zoom out, click on the plus sign "+" on the tools panel, it will become a minus sign "-".
9. **Right click** on the video to **Zoom Out**.

**NOTE:** The zoomed in picture can then be printed on a local/network printer.
