Re: SRX-Pro Version 2.3 Release

To all of our customers and partners;

i3 International is pleased to announce the upcoming release of SRX-Pro 2.3. This new version will be available on July 20, 2012. This version will be available for customer download from i3 FTP website. Production will continue using SRX-Pro v. 2.2.1.1 for all DVR/NVR units.

Note that Special Build routings will remain unchanged and will follow previously approved specifications. In order to move the Special Built routing to the new SRX-Pro 2.3 software release, the integrator/end user must indicate so in writing.

There are a number of new features that were implemented and several improvements that have been made since version 2.2.1.1

- **Multiple I/O Device Support:**

The following I/O devices and combinations are supported: a) single ADIO1616 I/O board; b) single WDT22 (USB I/O) board, c) multiple UIO8 devices; d) a combination of a single WDT22 (USB I/O) board and multiple UIO8 devices together.

- **Video Loss Control Trigger**

One or more control outputs can be activated in response to detected Video Loss event on a specified video channel. A separate setting allows keeping the selected Control output(s) ON until Video Loss event has been resolved.

- **Data Encryption added.**

User name and password information is now encrypted for added security

- **Sensor Recording Start/End Time Improvement.**

Under the new functionality, the Server will begin Sensor-based recording when the Sensor is first triggered and will stop recording once Sensor has returned to its original state (NC or NO).

- **Improved Critical Watchdog performance**

- **Single Channel Rotation added**

All channels can be rotated in a single-screen division in Live Mode.

- **Remote auto re-connect to Server function added**

- **Recording file size for AD4016 improved.**

Compression Quality setting added to Recording/Display setup page for units with AD4016.

- **Improvements to the Full Screen snapshot backup**
