Re: Windows IoT is now available for purchase

i3 International is pleased to announce that U2 and U3 units can now be purchased with Windows IoT (Windows 10 Embedded) operating system for an additional fee, on demand. Windows 7 Embedded remains the default factory operating system, however Windows IoT can be requested at the time of order placement.

Use the following part numbers when placing a new order to request Windows IoT to be installed on your U2/U3.

U2	U3
WIN10VA	WIN10HE

When opting for the newer operating system, consider the compatibility with other NVRs, cameras, encoders and i3 software already in the field, as applicable.

See bulletin 180316-SW-01-Windows OS and i3 Compatibility for more information.

Please consult with your Regional Sale Manager for more information.

Thank you very much for your attention and cooperation.
