

Re: SRX-Pro Service/Remote v6.0.2.114 Release Notice

To all of our customers and partners;

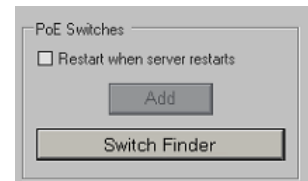

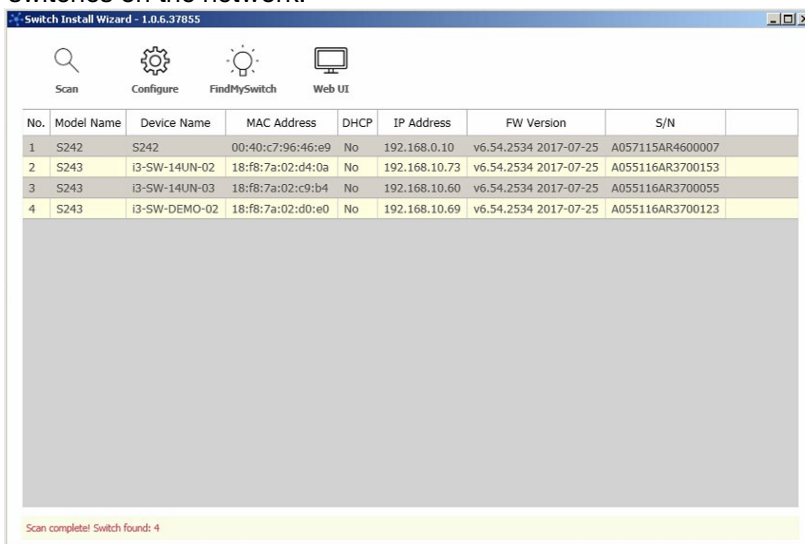

This bulletin is the official notice of the SRX-Pro Service, Console and Remote **v6.0.2.114** release.

The software installation package is now available for download from the i3 website: <http://i3international.com/software-downloads> and will be installed on all NVR units built in the factory from June 5, 2019 onward.

Reminder: SRX-Pro Server v.6.0 onwards is available in 64-bit version only. Because no 32-bit version package is available, legacy ADIO1616 I/O board (control card) will not be supported. Use WDT/WDT-22 I/O boards or UIO8 device instead.

v6.0.2.114 Improvements include:

- Support video loss events from HR16/Veo17 analog inputs. HR16/Veo17 video loss events can be configured to activate control(s), send out an email notification, record a log, and activate video loss alarm. "NO VIDEO" stream from HR16/Veo17 will no longer be recorded by SRX-Pro.
Limitation: Input1 on HR16/Veo17 must have an active analog input connected at all times for this function to work.
- Add Switch Finder button under SRX-Pro > Setup > System tab to find i3 switches on the network.

- Include ACT v1.5.2.2 into SRX-Pro installation package.
- Fixed issue: multi-drive video backup issue resolved.
- Fixed issue: IP video source removal resets Audio Source to "None" in the Hardware setup page.
- Fixed issue: Random SRX-Pro Service Monitor crash after system restart.

INTELLIGENT VIDEO DRIVING PROFIT
