

Re: SRX-Pro Service/Remote v6.0.2.146 Release Notice

To all of our customers and partners;

This bulletin is the official notice of the SRX-Pro Service, Console and Remote **v6.0.2.146** release.

The software installation package is now available for download from the i3 website:

<http://i3international.com/software-downloads> and will be installed on “Special Routing” NVR units built in the factory from November 18th, 2019 onward.

Note: i3’s main Production is currently in the transition period which will complete in February 2020, when SRX-Pro v.7 will become the standard software version for all standard NVR. SRX-Pro v6 is currently being installed on “Special Routing” units and based on explicit customer request only. To continue receiving your NVRs with SRX-Pro v6 pre-installed, please speak to your RSM to arrange for a “Special Routing” to be created for your NVRs.

Reminder: SRX-Pro Server v.6.0 onwards is available in 64-bit version only. Because no 32-bit version package is available, legacy ADIO1616 I/O board (control card) will not be supported. Use WDT/WDT-22 I/O boards or UIO8 device instead.

v6.0.2.146 Improvements include:

- S244 switch synced reboot function support. i3 switches synced reboot function is supported for full System reboots only (not Software reboot). For detailed instructions, refer to the [instructional bulletin](#).
- Annexus 57/77-series and 76-series camera support (pending release)
- Edge motion detection support for Ax57/77-series (pending release)
- Audio support (h.264 only) for the following i3 cameras: Annexus 83C, 85, 98, 76 (pending release). Use “IP Video With Audio” & “Annexus 7x/8x/9x AUDIO” GiPi adapter.
- Include ACT v1.6.2.2 into SRX-Pro installation package.
- Resolved: IP inputs loss after sorting the inputs in the descending order in IP camera tab and closing SRX-Pro.
- Updated Software Terms and Conditions and reference links
- Single license needed for 4PTZ mode on Ax78/98 cameras using FW v5.4.5 (Prior to improvement: 4 licenses were needed)
- Secondary display screen (monitor) support for SRX-Pro Remote. (Prior to improvement SRX-Pro Remote could be displayed on the primary monitor only)
- PAC Converter v2.0.2.21 integrated to resolve “NVR offline” CMS Web issue.

Limitations:

- In the unlikely event remote SRX-Pro upgrade via CMS fails, install PAC Converter 3.1.1.34
- VPC 7.0.2.X is needed to perform video backup simultaneously from 2 and more VPC instances. Use VPC 6.0.2.X for video backup from a single VPC instance at-a-time.
- VPC 7.0.2.X is needed for recorded Audio Out playback (audio sent from PC to IP Camera). Use VPC 6.0.2.X for recorded Audio In playback (audio recorded by IP camera’s microphone).
