i3Ai Sentry

AI-Driven Physical Identity Access Management Platform

Key Challenges

Managing physical access in today's fast-paced environments is becoming increasingly complex for businesses across various industries. Traditional access systems lack the flexibility, intelligence, and real-time monitoring required to ensure optimal security and operational efficiency.
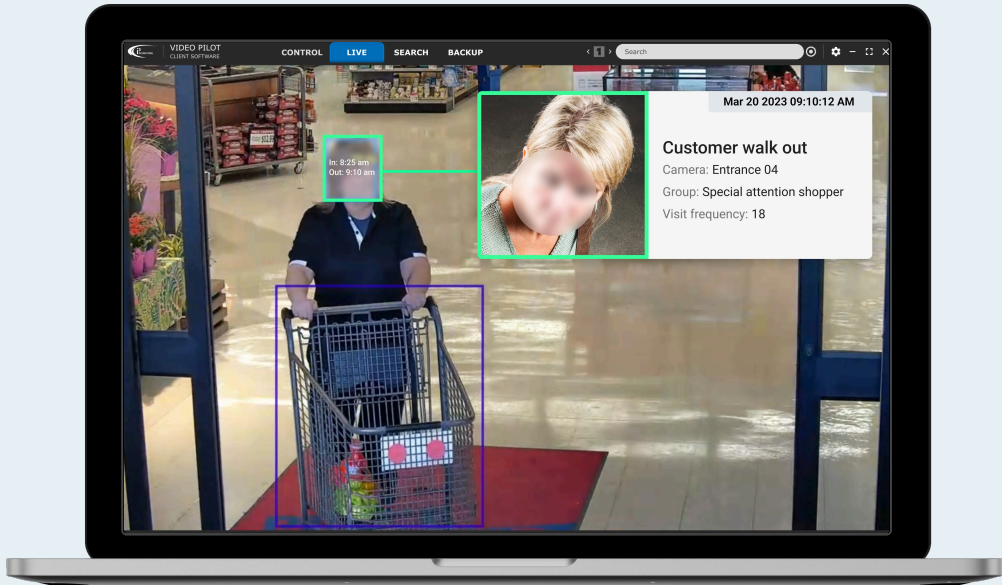

Solution: i3Ai Sentry

The **i3Ai Sentry** is a cutting-edge physical identity management solution that utilizes advanced **photo matching technology** to provide seamless control over access points, user management, and security oversight. By offering highly customizable access schedules, comprehensive reporting, and real-time alerts, i3Ai Sentry allows businesses to enhance their security protocols while maintaining a user-friendly interface.
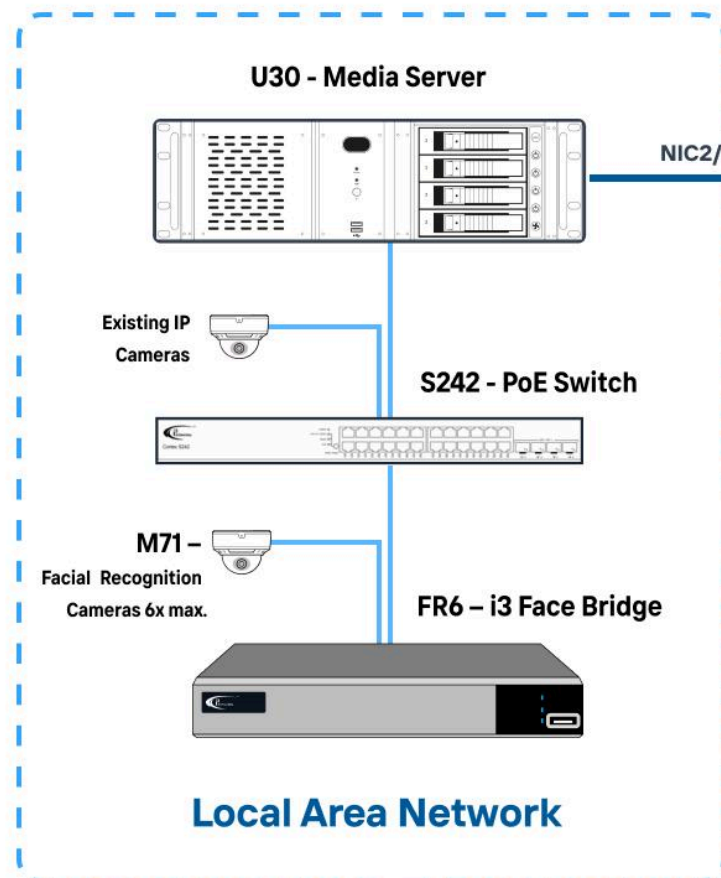

Key Benefits

Effortless User Management: Seamlessly add and manage user profiles using i3's intelligent photo matching technology for accurate real-time identity management.

Customizable Access Schedules: Control and tailor access to various facility areas, with advanced scheduling tools that ensure authorized access while monitoring attendance.

Comprehensive Reporting & Analytics: Strengthen security with real-time alerts, in-depth analytics, and customizable reports for complete oversight of access and operations.

Real-Time Alerts & Notifications: Stay informed with push notifications and email alerts for unauthorized access attempts or specific events, ensuring security breaches are promptly addressed.
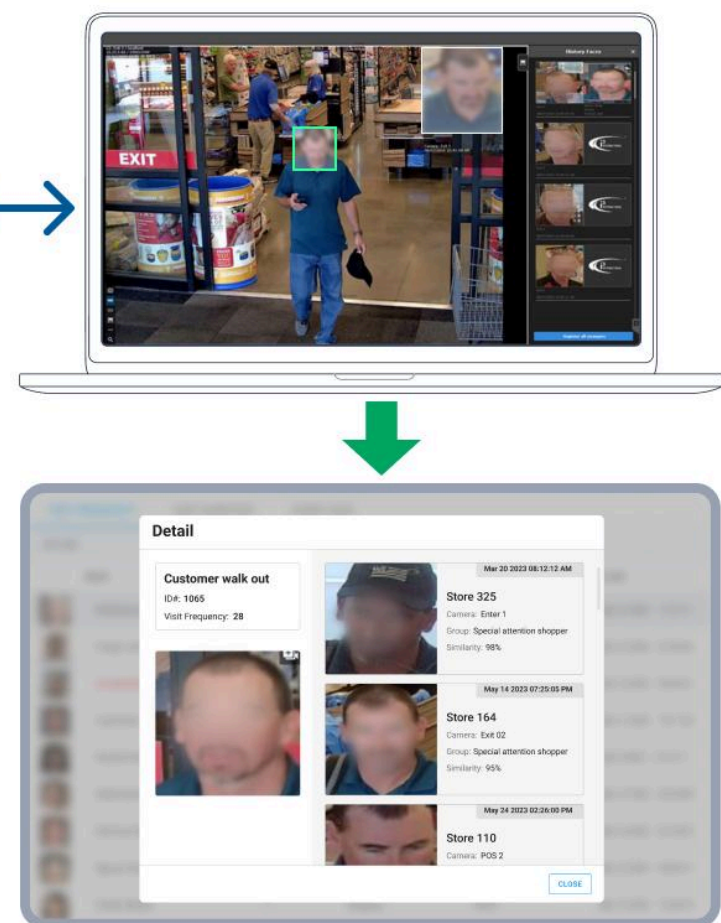

How it Works

- **Seamless Photo Matching & Access Control:** i3Ai Sentry utilizes state-of-the-art facial recognition to provide efficient access control. Integrated with photo matching optimized cameras, the system accurately identifies individuals and manages their access in real-time.

- **Optimized Camera Devices:** The system is driven by i3's photo-matching optimized M71 camera, ensuring the most accurate and seamless access experience.

- **Centralized Management:** Manage personnel databases across multiple sites from a single centralized portal, allowing businesses to efficiently control access on a large scale.

What Makes i3Ai Sentry Different

The **i3Ai Sentry** stands out with its **AI-driven facial recognition**, customizable access levels, and enterprise-grade cloud infrastructure. Its **plug-and-play installation**, paired with scalable infrastructure, ensures that the system is easy to deploy and manage across small to large enterprises. Unlike traditional access control systems, i3Ai Sentry offers more than just basic features—it delivers the **advanced intelligence** and **real-time insights** that businesses need to optimize both security and operations.

Use Cases

Retail Security: Prevent theft and unauthorized access by monitoring entry points, tracking visit frequency, and receiving real-time alerts on unwanted visitors or people of interest, ensuring a safe shopping experience.

Commercial Space Management: Secure different facility areas by controlling entry, monitoring employee attendance, and managing access to sensitive zones with ease.

Educational Institution Protection: Ensure campus safety by controlling student, staff, and visitor access, while implementing real-time alerts for unauthorized access attempts.
